

Overnight Checklist

Our goal is to make your dog feel as happy and calm as possible throughout the duration of his/her stay. Below are a few suggestions to help us do just that!

1. FOOD/TREATS

Provide your pet with enough food and treats to last the entire duration of your dog's stay. Use small plastic baggies to package pre-measured meals or provide the correct measuring scoop/cup you would use at home for accurate dispensing. This will ensure that your dog is getting exactly the right amount of food for each meal. If there is any food leftover, then we will be able to tell that your dog may be feeling stressed, uncomfortable, or right at home.

2. MEDICINE & SUPPLEMENTS

Many dogs must take certain medication and/or supplements daily, and we will be happy to administer oral medications as needed. Include the appropriate number of doses that your dog will need to take in your absence, as well as written instructions with details such as dosage amount and schedule.

3. FAVORITE TOYS & BEDDING

We are well equipped with all sorts of toys for your pet to play with and bedding for them to lay on. However, almost every dog has their favorites that they just can't live without. Pack 1 or 2 of these toys and bed or blanket to make sure your dog has all that he/she enjoys at home.

4. A REMINDER OF HOME

To keep your dog feeling close to you even in your absence, include something with your scent like a blanket, sock, t-shirt, etc.

5. MISCELLANEOUS

A leash for long walks and for moving your pet to the play area. A bark collar, if you own one to help keep the peace.

6. REMINDER: Remember to bring proof of vaccinations.
